

XURA

XRP Wallet · Blockchain Gaming Platform

Non-custodial · On-chain games · 10 languages · Android · Since 2022

v26.6.17 | minSdk 28 | Java · MVVM · Hilt

What is XURA?

XURA is a non-custodial mobile wallet for the XRP Ledger combined with a blockchain-verifiable gaming platform.

Every bet is a real on-chain XRP transaction. Winnings are paid back directly to your wallet address — no withdrawal requests, no hidden balances, no trust required.

The wallet works on XRPL Mainnet right now. Game server coming soon.

■ XRPL Wallet

Non-custodial · Mainnet-ready · Secure seed storage

■ On-chain Casino

Roulette · Guess Color · Guess Number

■ Referral System

On-chain registration · Bonus lives · Daily draws

Why XURA?

Feature	Traditional Casino	XURA ✓
Fund custody	Platform holds your funds	User — non-custodial
Deposits	Internal balance (off-chain)	Direct XRPL transaction
Withdrawals	Request required, may freeze	Not needed — on-chain
Transparency	Limited / opaque RNG	Every bet verifiable
Private key	Not applicable	Never leaves your device
Funds at risk	Platform insolvency risk	Zero — always on XRPL

Mini-Ecosystem

- XRPL Wallet
- On-chain Casino
- Referral Platform

Vision: The Future of On-Chain Gaming

XURA is a proof-of-concept, not just a product.

This is a reference implementation of how on-chain gaming should work — transparent, non-custodial, and verifiable by anyone on any chain.

No casino account

Users keep custody of funds at all times.
No deposit. No withdrawal request.

Every bet = real tx

Bets are native blockchain transactions
with verifiable memos.

Server cannot cheat

Every outcome is signed. Results are
verifiable on-chain by anyone.

Wallet Features

Create Wallet

New XRPL keypair — seed shown once, encrypted in Android Keystore AES-256-GCM

Restore Wallet

Import any XRPL account via 16-word seed phrase

Send XRP

Hand input or QR scan · destination tag · confirmation dialog

Receive XRP

Your address as QR code + one-tap copy

Transaction History

Real-time list via WebSocket subscription to `wss://xrplcluster.com`

Live Balance

Persistent WebSocket — balance updates without refresh

Testnet Mode

Switch to XRPL Altnet for development without real funds

Security

Android Keystore AES-256-GCM

Seed encrypted in TEE — never exposed in plaintext

Biometric Unlock

Fingerprint / Face ID via androidx.biometric (BIOMETRIC_STRONG only)

App Password (PBKDF2)

Optional PIN/password — salted hash, never stored in plaintext

Inactivity Auto-lock

Screen locks after configurable idle period

Root & Tamper Detection

Warns if device is rooted or APK is re-signed with unknown key

FLAG_SECURE

Prevents OS screenshots on seed display and password entry screens

Clipboard Safety

Confirmation dialog before paste — guards against address-swap attacks

Your keys. Your coins.

Seed never touches any server

App Screenshots

Referral System

1 Register on-chain
Pay 66 XRP registration fee → recorded on the XRP Ledger.
13 XRP refunded on exit.

2 Share your code
Invite users — unlimited slots for invited users.
Number of referral positions is limited.

3 Earn together
Both you and your referrals get bonus lives per bet.
Participate in the daily prize draw.

4 Recover anytime
Lost your code? Recover it for 13 XRP.
All on-chain — transparent and auditable.

Fee breakdown

Registration fee	66 XRP
Exit refund	13 XRP
Net cost	53 XRP
Referral slots	Limited
Invited users	∞

Roadmap

✓ Completed

- ✓ Non-custodial XRP wallet — Mainnet ready
- ✓ Biometric + password security (PBKDF2 + Keystore AES-256)
- ✓ QR send / receive + camera scanner
- ✓ Real-time transaction history (WebSocket)
- ✓ European Roulette — full table UI + protocol
- ✓ Guess the Color / Guess the Number — UI + protocol
- ✓ Referral system — on-chain registration & management
- ✓ 10-language localisation (EN, RU, ZH, HI, ES, FR, DE, AR, PT, BN)
- ✓ 79 automated tests

■ Coming Soon

→ Game server launch ← ETA: coming weeks

→ Push notifications for incoming payments

→ Google Play release
